ArctaPHOS
Ambassador

The background of the entire image is a dark, textured surface. Overlaid on this is a complex network of thin, light-gray lines connecting small, semi-transparent white spheres, creating a web-like or molecular structure. In the center, a hand is visible, holding a glowing, semi-transparent sphere. This sphere is covered in a grid of fine white dots. Surrounding this central sphere are several glowing white elliptical orbits, similar to the Bohr model of an atom, with small white dots at their intersections and along their paths. The overall aesthetic is high-tech and futuristic, suggesting a fusion of nature and technology.

A HAIRCARE SYSTEM FORTIFIED BY AI TECHNOLOGY

Our formula is enhanced with potent peptides discovered by AI-powered technology that is able to detect and predictively measure the bioactivity of molecules derived from natural sources, for its therapeutic potential and efficacy.

Increase Hair Volume

Scutellaria Baicalensis
& Caffeine

Vegetal Proteins

Tara Tannins

Biotin

Argan Oil

Strengthening & Thickening Shampoo (300ml)

A botanical formula that gently cleanses the scalp and creates the optimal environment for new hair growth. Fortified with botanical complexes and caffeine to improve both hair density and thickness. The peptides discovered with AI technology, provides hair with long-lasting protection against environmental aggressors, heat damage and repairs chemically treated hair.

Suitable For Hair loss, thinning hair, damaged hair

For Softer, Fuller Hair
